Online-News for Plastics and Pharma Technologies

inForm.Intro

Dear Readers,

Everyone`s talking about the topic sustainability – and it is also very important at Braunform. We hold ourselves responsible for the protection of our planet's resources, and for the conservation of an intact environment for our generation and for future generations. We want to contribute to improve the quality of life for mankind and animals and to meet the environmental protection requirements. From this awareness, we obligate ourselves to implement continuous improvements in favor of the environment.

Sustainability has many faces at Braunform. Compliance with legal regulations for the protection of the environment is the responsibility of the employees at all corporate levels. Special responsibility lies with the managers who contribute as role models to further develop the environmental policy and the environmental consciousness of the employees and in anchoring environmental protection within the corporate culture. We obligate ourselves to actively further develop environmental protection in production as well as in our products and thus reduce environmental impact. We design all phases of production to be as environmentally compatible as possible and pay attention to a continuous reduction of our waste accrual.

The careful handling of resources is very important to us. For this reason, we are particularly pleased that TÜV Süd recently confirmed our qualified energy management system according to DIN EN ISO 50001:2011 and the environmental management system according to DIN EN ISO 14001:2015. This drives us to continue to operate and demonstrate consistent management. It is only in this way that can we ensure our responsibility to the environment.

In this sense we wish a nice spring time,
Pamela Braun

Two fairs at the same time: Pharmapack Europe & PlastIndia

Almost at the same time the PHARMAPACK Europe in Paris, France, and the PlastIndia fair in Gandhinagar, India, took place in February. Braunform was represented with a small booth and a team of experts.

We would like to thank all for your visit at our booth.

Between lecture hall and workshop - the combination makes it

In addition to eight training occupations in the technical and commercial fields, Braunform GmbH also offers two dual courses of study.
